TRANSMITTAL COVER SHEET

DATE: AUGUST 29, 2023

TO: ALL PLAN HOLDERS OF RECORD

FROM: HUNTER SWATEK, PROJECT MANAGER

PROJECT: ALABAMA COMMUNITY COLLEGE SYSTEM WORKFORCE SKILLS TRAINING CENTER
GMC PROJECT NO. ABHM210048

RE: ADDENDUM NO. 1 AND
ACKNOWLEDGEMENT OF RECEIPT OF ADDENDUM NO. 1

ACKNOWLEDGEMENT OF RECEIPT:

PLEASE PRINT RECIPIENT'S NAME, FIRM, AND DATE RECEIVED.

THEN E-MAIL BACK TO alyssa.martin@gmcnetwork.com FOR OUR RECORDS AND TO ACKNOWLEDGE YOU'RE RECEIPT OF THIS ADDENDUM.

_____
NAME *(PLEASE PRINT)*

_____
FIRM *(PLEASE PRINT)*

_____
DATE RECEIVED *(PLEASE PRINT)*

If there are any problems with this transmittal, please contact sender, at the number listed above.

ADDENDUM NUMBER 01

AUGUST 29, 2023

PROJECT: **ALABAMA COMMUNITY COLLEGE SYSTEM WORKFORCE SKILLS TRAINING CENTER**
GMC PROJECT NO. ABHM210048

AD1-1 GENERAL:

A. The following revisions and/or additions to the Drawings and Project Manual are hereby made a part of same, and shall be incorporated in the Work of the Contract the same as if originally included in the Bid and Construction Documents.

B. Bidders shall acknowledge receipt of this Addendum in writing, as provided on the Proposal Form.

C. When a revision and/or addition is called for to the Drawings or Project Manual, they shall be fully coordinated with and carried through all applicable Drawings and portions of the Project Manual, including in part, all related Civil, Landscaping, Architectural, Structural, Plumbing, Mechanical, Electrical, and other Documents.

AD1-2 PROJECT MANUAL AND SPECIFICATIONS:

1. 32 3413 - FABRICATED PEDESTRIAN BRIDGES:
   A. Reference New Specification Section 32 3413 FABRICATED PEDESTRIAN BRIDGES

AD1-3 DRAWINGS:

2. CIVIL:
   B. Reference Revised Sheet C0.3 - DEMOLITION PLAN
      a. Preserving, protecting and relocating certain light poles rather than removing them.
   C. Reference Revised Sheet C1.0 - SITE LAYOUT PLAN
      a. Changed note regarding the pedestrian bridge.
   D. Reference Revised Sheet C2.0 - SITE UTILITY PLAN
      a. Changed the depth of the wet well for the sanitary sewer pump.
   E. Reference New Sheet C5.3 - CONSTRUCTION DETAILS
      a. Pedestrian bridge details.

2. Architectural:
   A. Reference Revised Sheet A2.03 – REFLECTED CEILING PLAN – LEVEL 2 PART A
      a. Revisions to ceiling heights
   B. Reference Revised Sheet A2.04 – REFLECTED CEILING PLAN – LEVEL 2 PART B
      a. Revisions to ceiling heights
   C. Reference Revised Sheet A4.01 – EXTERIOR ELEVATIONS
      a. Revisions to ACM panel layout and CW mullion layout.
      b. Entry Lobby parapet height adjusted to 29'-8". Wall Section adjustments to follow in AD 02.

C. Reference Revised Sheet A5.33 – VERTICAL CIRCULATION
   a. Revision to cable railing annotation
D. Reference Revised Sheet A6.02 – DOOR DETAILS
   a. Revision to door location in wall assembly to ¾" from face of sheathing.
E. Reference Revised Sheet A6.11 – CW /SF LEGEND AND SCHEDULE
   a. Revisions to mullion alignments to match ACM layout.

3. Mechanical:
   A. Reference Revised Sheet M3.01 - STORM SHELTER - HVAC
      a. Power Revision to Emergency Ventilation Fan

4. Electrical:
   A. Reference Revised Sheet E0.01 – ELECTRICAL SITE PLAN
      a. Revised underground primary design.
   B. Reference Revised Sheet E0.02 – ELECTRICAL SITE LIGHTING PLAN
      a. Revised site lighting at south end of site.
   C. Reference Revised Sheet E0.04 – STORM SHELTER ELECTRICAL PLANS
      a. Revised electrical associated with storm shelter water heater.
   D. Reference Revised Sheet E1.02 – LEVEL 1 LIGHTING PLAN - PART B
      a. Revised layout of mark D15 lights within Aerospace 113. Revised exterior lighting design at overhead door in Cutting 126.
   E. Reference Revised Sheet E2.01 – LEVEL 1 POWER PLAN - PART A
      a. Revised name of one wall heater and added one wall heater in Corridor 101.
   F. Reference Revised Sheet E2.02 – LEVEL 1 POWER PLAN - PART B
      a. Revised receptacle layout near entrance to Aerospace 113.
   G. Reference Revised Sheet E2.04 – LEVEL 2 POWER PLAN - PART B
      a. Revised name of wall heater in Stair 2 ST-1.
   H. Reference Revised Sheet E4.01 – ELECTRICAL EQUIPMENT SCHEDULES
      a. Revised panelboard LP-1B, circuits 11, 12.
   I. Reference Revised Sheet E4.02 – ELECTRICAL EQUIPMENT SCHEDULES
      a. Revised panelboard LP-1A, circuits 10, 11.
   J. Reference Revised Sheet E4.05 – ELECTRICAL EQUIPMENT SCHEDULES
      a. Revised panelboard RP-SS, circuits 11, 12, 13.
   K. Reference Revised Sheet E5.01 – SINGLE LINE DIAGRAM
      a. Added Single Line Diagram Note 5. Revised minimum burial depth of underground primary and added requirement for warning tape.
   L. Reference Revised Sheet E5.06 – ELECTRICAL DETAILS
      a. Removed mark letter Q from Lighting Fixture Schedule.

AD1-4 MISCELLANEOUS:

A. Bidding RFI Log

B. Subject to compliance with requirements of the Bid and Contract Documents, including single source

coordination, the following manufacturer(s) has made proper and timely submittal for consideration of product(s), **or** the following supplier(s) has made proper and timely submittal of its firm(s), and has subsequently been found to be an acceptable manufacturer or supplier:

1. Specification Section 23 6000 – AIR DISTRIBUTION - Titus or Price VAV Model EZT Single Duct Air Terminals shall be **NOT approved**.

AD1-5 ATTACHMENTS:

A. Bidding RFI Log
B. New Specification Section 32 3413
C. Substitution Request - Section 23 6000
D. Revised Sheet C0.3 - DEMOLITION PLAN
E. Revised Sheet C1.0 - SITE LAYOUT PLAN
F. Revised Sheet C2.0 - SITE UTILITY PLAN
G. New Sheet C5.3 - CONSTRUCTION DETAILS
H. Revised Sheet – A2.03 REFLECT CEILING PLAN LEVEL 2 PART A
I. Revised Sheet – A2.04 REFLECT CEILING PLAN LEVEL 2 PART b
J. Revised Sheet – A4.01 EXTERIOR ELEVATIONS
K. Revised Sheet – A5.33 VERTICAL CIRCULATION
L. Revised Sheet – A6.02 DOOR DETAILS
M. Revised Sheet – A6.11 CW / SF LEGEND AND SCHEDULE
N. Revised Sheet M3.01 - STORM SHELTER - HVAC
O. Revised Sheet E0.01 – ELECTRICAL SITE PLAN
P. Revised Sheet E0.02 – ELECTRICAL SITE LIGHTING PLAN
Q. Revised Sheet E0.04 – STORM SHELTER ELECTRICAL PLANS
R. Revised Sheet E1.02 – LEVEL 1 LIGHTING PLAN - PART B
S. Revised Sheet E2.01 – LEVEL 1 POWER PLAN - PART A
T. Revised Sheet E2.02 – LEVEL 1 POWER PLAN - PART B
U. Revised Sheet E2.04 – LEVEL 2 POWER PLAN - PART B
V. Revised Sheet E4.01 – ELECTRICAL EQUIPMENT SCHEDULES
W. Revised Sheet E4.02 – ELECTRICAL EQUIPMENT SCHEDULES
X. Revised Sheet E4.05 – ELECTRICAL EQUIPMENT SCHEDULES
Y. Revised Sheet E5.01 – SINGLE LINE DIAGRAM
Z. Revised Sheet E5.06 – ELECTRICAL DETAILS

END OF ADDENDUM NUMBER 01

PREPARED BY

2400 5th Avenue S, Suite 200 | Birmingham, Alabama 35233
Tel 205.879.4462 | GMCNETWORK.COM
Goodwyn Mills Cawood, LLC.

NO.	Asker	Question	ADD #	Response
	*Questions received during the week of *DATE*			
1	BH	Please reference sheet C1.0. Please provide specs, details etc. for the Contech Pedestrian Bridge.	1	Specification to be provided in AD 01.
2	BH	Has any portion of this project been creating in Revit or any other 3D Modeling software? And if so, can the model be provided to the GCs prior to bid for use during the bidding process? Also, can the model be provided to the GC for use during construction and creation of coordination drawings.	1	3D Models will not be available during bidding, but will be provided during construction as requested.
3	BH	Can CAD files for Civil be provided to GCs?	1	CAD files will not be available during bidding, but will be provided during construction as requested.
4	BH	Please reference sheet A5.31 and spec section 057316 Steel Cable Railing System. Lobby Stair A3/A5.31 states R1 Cable Guardrail per Railing Schedule while details for R1 on A1,A4/A5.33 showing 5/8" diameter bar guardrail system. Please advise which railing system is correct steel cable railing or 5/8" diameter bar guardrail system.	1	Steel cable railing is correct. A5.33 to be amended in AD 01.
5	F	Due to this building only being a 2-stop low rise building, will providing a machine roomless hydraulic elevator be acceptable?	1	A machine roomless hydraulic elevator is not accepted.
6	F	Please see attached for substitution request.	1	Anemostat VAV Not Approved
7	F	Can we use type L copper on 2" pipe and smaller instead of schedule 40 black steel pipe?	1	Approved . Dielectric unions required at all connections of dissimilar metals
8	F	What size pipe is going to each chiller 4" or 6"? M5.01 shows 6" and M2.01B shows 4". Please advise.	1	Install per M2.01B
9	F	Please see attached fpr substitution request.	2	Substitution requests will be outlined in AD 02.
10	F	Please see attached explaining RFI for ACM Panels. The architect has these panels at over 5'-1" ver:cal centers and over 6'-0" horizontal centers. The absolute maximum width for an ACM panel is 4'-11¼" in one direc:on; meaning the panel can exceed the 4'-11" in one direc:on but not both direc:ons. A 4'-11" x 15'-11" is possible, but a 5'-0" x 5'-0" or a 6'-0" x 8'-0", or etc. panel is not possible due to sheet/CNC/fabrication limitations.	1	ACM Panel layout has been modififed on A4.01 to meet industry standards for manufacturing. CW mullion layout has also been revised on A6.11. Joint width on the wall sections can be disregarded. A standard joint width is acceptable to be used throughout.

SECTION 32 3413
FABRICATED PEDESTRIAN BRIDGES

PART 1 GENERAL

1.01 SECTION INCLUDES

A. Steel, fully engineered, clear span bridge and foundation system.

1.02 RELATED REQUIREMENTS

A. Drawings and general provisions of the Contract, including General and Supplementary Conditions and Division 1 Specification Sectionss apply to the work of this Section.

B. Section 01 3000 - Administrative Requirements: Submittal procedures, project meetings, progress schedules and documentation, reports, coordination.

C. Section 01 4000 - Quality Requirements: Procedures for testing, inspection, mock-ups, reports, certificates; use of reference standards.

D. Section 01 7800 - Closeout Submittals: Project record documents, operation and maintenance (O&M) data, warranties and bonds.

1.03 SUBMITTALS

A. See Section 01 3000 - Administrative Requirements, for submittal procedures.

B. Product Data: Provide manufacturer's product data.

C. Shop Drawings: Indicate Section-thru details, mounting methods, typical elevations, key plan layout. Show actual field conditions and true elevation and location after field verification.

D. PRELIMINARY SUBMISSIONS: Prior to the start of fabrication or construction, the Contractor shall submit to the Architect a design package, which shall include but not limited to the following:
   1. DETAILED PLANS:
      a. REGISTRATION / SEAL: Sealed by a licensed Professional Engineer (Alabama).
      b. PLAN VIEW: Full plan view of the bridge deck, foundation and railing system drawn to scale. The plan view must reflect the proposed horizontal alignment as shown on the design plans.
      c. ELEVATION VIEW: Full elevation view of the bridge deck, railing and foundation system drawn to scale which reflect the actual vertical alignment. Elevation views shall indicate the elevation at the top and bottom of the boardwalk and foundation system components, horizontal and vertical break points, and location of the finished grade.
      d. DETAILS: Details of all bridge deck, foundation, and railing system components and their connections such as the length, size and where changes occur; connections; etc.
      e. CODE REFERENCE: Design parameters used along with AASHTO references.

E. DESIGN COMPUTATIONS: computations shall:
   1. Be stamped by a licensed Professional Engineer in the state of Alabama.
   2. Computations shall clearly refer to the applicable AASHTO provisions
   3. Documentation of computer programs including all design parameters.

F. FINAL SUBMISSION: Once a bridge deck, foundation and railing system design has been reviewed and accepted by the Owner, the Contractor shall submit the final plans. The designer of the bridge deck, foundation and railing system is responsible for the review of any drawings prepared for fabrication. One set of all approved shop drawings shall be submitted to the Architect’s permanent records.

1.04 QUALITY ASSURANCE

A. Designer Qualifications: Perform design under direct supervision of a Professional Engineer experienced in design of this type of work and licensed in the State in which the Project is located.

B. Manufacturer Qualifications: Company specializing in manufacturing products specified in this section, with not less than five years of documented experience and a minimum of five successful bridge projects of similar scale within the last three years.
   1. Components shall be factory fabricated and engineered by single entity.

C. Acceptability Criteria for Concrete Deck (if applicable): The finished visible (in the final installed position) surface shall have no obvious imperfections other than minimal color or texture variations from the approved samples or evidence of repairs when viewed in good typical daylight illumination with the unaided naked eye at a 20 ft. viewing distance. Appearance of the surface shall not be evaluated when light is illuminating the surface from an extreme angle as it tends to accentuate the minor surface irregularities. The following is a list of finish defects that shall be properly repaired, if obvious when viewed at a 20 ft. distance. Patching (by a trained skilled concrete repair person) is an acceptable repair method.
   1. Ragged or irregular surfaces.
   2. Adjacent flat and return surfaces with greater texture and/or color differences than the approved samples or mockups.
   3. Casting and/or aggregate segregation lines evident from different concrete placement lifts and consolidation.
   4. Visible mold joints or irregular surfaces.
   5. Rust stains on exposed surfaces.
   6. Units with excessive variation in texture and/or color from the approved samples, within the unit or compared with adjacent units.
   7. Blocking stains evident on exposed surfaces.
   8. Foreign material embedded in the surface.
   9. Visible repairs at a 20 ft. viewing distance.
   10. Cracks visible at a 20 ft. viewings distance.

1.05 MOCK-UP

A. See Section 01 4000 - Quality Requirements for additional requirements.

B. Mock-Up: Provide, if required by Architect, a mock-up for evaluation of the concrete deck and structural steel showing the surface preparation techniques and application workmanship.
   1. Finish areas designated by Architect / Engineer.
   2. Do not proceed with remaining work until mock-up is accepted by Architect / Engineer.
   3. Refinish mock-up area as required to produce acceptable work.

1.06 DELIVERY, STORAGE, AND HANDLING

A. Store products in manufacturer's unopened packaging until ready for installation.

B. Coordinate with fabrication and delivery schedule of handrails.

1.07 WARRANTY

A. See Section 01 7800 - Closeout Submittals, for additional warranty requirements.

B. Bridge Manufacturer shall warranty all components against defects in material and workmanship for period of 10 years from date of Substantial Completion.

C. Contractor shall be responsible for installation defects for 12 months from date of Substantial Completion.

PART 2 PRODUCTS

2.01 MANUFACTURER / PRODUCT

A. CONTECH Engineered Solutions LLC; "Continental Pedestrian Bridge": www.contechES.com.

or Approved Equal. Substitutions: See Section 01 6000 - Product Requirements.

2.02 GENERAL FEATURES OF DESIGN

A. Span: Bridge span shall be 70' - 0" from each end of the bridge.

B. Width: Bridge width shall be 6' - 0" measured at the inside face of strucutral elements at the deck level.

C. Bridge System Type:
   1. Bridge shall be designed utilizing an underhung floor beam or an H Section configuration where the floor beams are placed inside the trusses and attached to the truss verticals. The bridge manufacturer shall determine the distance from the top of the deck to the top and bottom truss members based upon structural and/or shipping requirements.
   2. The top of the top chord shall not be less than 54 inches above the deck.

D. Member Components
   1. All members of the vertical trusses (top and bottom chords, verticals, and diagonals) shall be fabricated from square and/or rectangular structural steel tubing. Other structural members and bracing shall be fabricated from structural steel shapes or square and rectangular structural steel tubing.

E. Attachments
   1. Horizontal Safety Rails
      a. Horizontal safety rails shall be placed on the structure up to a minimum height of 48" above the deck surface. Safety rails shall be placed so as to prevent a 4" sphere from passing through the truss. Safety rails shall be placed on the inside or outside of the structure at the bridge fabricator's option. Safety rails placed on the inside of the truss shall have their ends sealed and ground smooth so as to produce no sharp edges.
      b. The safety rail system shall be designed for an infill loading of 200 pounds, applied horizontally at right angles, to a one square foot area at any point in the system.
   2. Toe Plate
      a. The bridge shall be supplied with a steel toe plate mounted to the inside face of both trusses. The toe plate shall be a minimum of 4 inches high. Toe plating will be welded to the truss members at a height adequate to provide a 2" gap between the bottom of the plate and the top of the deck or the top of the bottom chord, whichever is higher. The span of unstiffened flat toe plating (from center to center of supports) shall not exceed 5'-8".

F. In addition to the dead loads of the system, the structure shall be designed for the live loads defined in Article on Materials below.

2.03 MATERIALS

A. Painted Steel: Shall conform to the following
   1. All Blast Cleaning shall be done in a dedicated OSHA approved indoor facility owned and operated by the bridge fabricator. Blast operations shall use Best Management Practices and exercise environmentally friendly blast media recovery systems.

B. Concrete Deck: Shall confirm to the following
   1. The bridge shall be furnished with a galvanized steel form deck suitable for pouring a reinforced concrete slab. The form deck shall be designed to carry the dead load of the wet concrete, weight of the form decking, plus a construction load of 20 PSF uniform load or a 150 pound concentrated load on a 1'-0" wide section of deck. When edge supports are used, deflection is limited to 1/180 of the span or 3/4", whichever is less. Without edge supports, deflection shall be limited to 1/180 of the span or 3/8", whichever is less.

PART 3 EXECUTION

3.01 INSTALLATION

A. FABRICATED PEDESTRIAN BRIDGE
   1. Installation of the bridge system, foundation, and railings, if applicable, shall be performed in accordance with the approved plans and manufacturers installation instructions. Bridge manufacturer shall provide a field representative to review installation instructions with the Contractor and Engineer and to certify that the installation has been performed according to the approved drawings and manufacturer’s instructions.

PRIOR APPROVAL / SUBSTITUTION REQUEST FORM

Date: 08/24/2023

Company Submitting Request: Albireo Energy, LLC
(Name and Address)
1110 Retail Dr. NW Huntsville, AL 35816

Contact Name: Brian Overstreet **Phone:** 512-970-1261 **Fax:** _____

E-Mail: boverstreet@albiereoenergy.com

PROJECT NAME: CCC Workforce Development

SPECIFIED ITEM: 236000 (Section) 2 (Page) Titus or Price VAV (Description)

The undersigned requests consideration of the following product substitution:

PROPOSED SUBSTITUTION: □nem□stat □□T Sing□e Du□t □ir Termina□
Provide Product Name / Model /Manufacturer

1. Attached data includes: __X__ Product Description _____ Performance and Test Data
   _____ Drawings __X__ Specifications _____ Photographs

2. _____ Yes / No changes will be required to the Contract Documents for the proper installation of proposed product substitution. If yes, then attach data that includes description of changes.

The undersigned states that the following paragraphs, unless modified by attachments, are correct:

1. The proposed substitution does not affect dimensions shown on the drawings.
2. No changes to the building design, engineering design, or detailing are required by the proposed substitution.
3. The proposed substitution will have no adverse effect on other trades, the construction schedule, or **specified warranty requirements.**
4. No maintenance is required by the proposed substitution other than that required for originally specified product.
5. Other Information

The undersigned further states that they have read the corresponding specification section in the project manual and confirms that the function, appearance and quality of the proposed substitution are equivalent or superior to the originally specified product. BO initial.

DEMOLITION NOTES

1. THE CONTRACTOR SHALL BE RESPONSIBLE FOR FIELD VERIFICATION OF THE LOCATION OF ALL UTILITIES IN ALL AREAS TO BE REMOVED OR DEMOLISHED, PRIOR TO COMMENCEMENT OF WORK. THE UTILITIES TO BE LOCATED SHALL INCLUDE, BUT NOT BE LIMITED TO WATER, GAS, SANITARY SEWER, STORM SEWER, SITE LIGHTING, IRRIGATION, SECURITY, CABLE, SITE ELECTRICAL, FIBER OPTIC, AND TELEPHONE.
2. ALL UTILITIES TO BE REMOVED SHALL BE CUT, REMOVED, CAPPED, ETC. ACCORDING TO ALL GOVERNING AGENCIES SPECIFICATIONS. THE CONTRACTOR SHALL BE RESPONSIBLE FOR CONTACTING ALL UTILITY AGENCIES PRIOR TO ANY WORK BEING PERFORMED ON THEIR RESPECTIVE LINES. THE CONTRACTOR SHALL BE RESPONSIBLE FOR NOTIFYING AND INFORMING EACH UTILITY AGENCY OF THE SCOPE OF WORK AND SCHEDULE OF COMPLETION, AND SHALL COORDINATE ALL INSPECTIONS.
3. THE CONTRACTOR SHALL VERIFY ALL UTILITY LOCATIONS IN THE FIELD AND SHALL LOCATE ON THE GROUND WITH PAINT OR OTHER EASILY VISIBLE MEANS ALL UNDERGROUND UTILITIES PRIOR TO ANY CONSTRUCTION EFFORTS. THE UTILITIES TO BE LOCATED SHALL INCLUDE, BUT NOT BE LIMITED TO WATER, GAS, SANITARY SEWER, STORM SEWER, SITE LIGHTING, IRRIGATION, SECURITY, CABLE, SITE ELECTRICAL, AND TELEPHONE. CONFLICTS OR DISCREPANCIES SHALL BE BROUGHT TO THE ATTENTION OF THE PROJECT ENGINEER IMMEDIATELY. THE UTILITIES SHOWN ARE ILLUSTRATED AS LOCATED ON THE GROUND BY LINE LOCATORS, SURVEY OF ABOVE GROUND STRUCTURES, AND/OR ACCORDING TO UTILITY MAPS OR UTILITY ADMINISTRATOR'S RECOLLECTION, AND ARE PROVIDED AS INFORMATION ONLY.
4. THE CONTRACTOR SHALL PRESERVE AND PROTECT, ACCORDING TO THE INSTRUCTIONS OF THE UTILITY INVOLVED, ANY "LIVE" UTILITIES LOCATED BY THE UTILITY COMPANY OR THE CONTRACTOR.
5. DEMOLITION ITEMS SHOWN ARE CONSIDERED TO BE A MINIMUM. UNDERGROUND STORAGE TANKS AND UNMARKED UTILITIES SHOULD ALSO BE REMOVED AND BACKFILLED WITH PROPERLY COMPACTED MATERIAL. THESE UTILITIES MAY INCLUDE, BUT NOT LIMITED TO SANITARY SEWER LATERALS, TELEPHONE LINES, CABLE LINES, GAS LINES, WATER LINES, ETC.
6. THE CONTRACTOR SHALL BE RESPONSIBLE FOR REMOVAL AND RELOCATION OF ALL UTILITY LINES LOCATED UNDERNEATH THE PROPOSED BUILDINGS.
7. THE CONTRACTOR SHALL BE RESPONSIBLE FOR THE REPLACEMENT OF ALL CONCRETE, SIDEWALKS, WALLS, ETC. DAMAGED DURING CONSTRUCTION. ALL DISTURBED AREAS SHALL BE RESTORED TO THE ORIGINAL CONDITION OR AS ACCEPTED BY THE OWNER.
8. THE CONTRACTOR SHALL FIELD VERIFY THE EXTENTS AND LOCATIONS OF THE EXISTING WATER SERVICE PIPING. THE CONTRACTOR SHALL REUSE BOTH OF THESE LINES FOR SERVICE TO THE NEW BUILDING. IF THE EXISTING SERVICE LINES ARE LOCATED UNDERNEATH THE PROPOSED BUILDING, THE CONTRACTOR SHALL RE ROUTE THE LINE AROUND THE BUILDING AND TIE INTO EACH LINE WITHIN THE PROPERTY BOUNDARY.

NOTES:
REQUIRED - ONE (1) AK INDUSTRIES PACKAGE WET WELL ASSEMBLY AS SUPPLIED BY ESHELMAN COMPANY AND PRE-PACKAGED BY TECHNICAL SALES CORPORATION - TAMPA, FLORIDA OR AK INDUSTRIES - PLYMOUTH, INDIANA; OR ENGINEER PRE-APPROVED EQUAL. PRE-SUBMITTAL PACKAGES SHALL BE SUBMITTED TO ENGINEER AT LEAST FIFTEEN (15) DAYS PRIOR TO BID DATE.

PRE-PACKAGED PUMP STATION SHALL INCLUDE THE FOLLOWING:

- QTY. TWO (2) - EBARA MODEL 80DLFU61.5 SUBMERSIBLE SEWAGE PUMPS - RATED FOR 90 GPM @ 24.5' TDH
- QTY. TWO (2) - EBARA MODEL LM80 QDC - TO INCUDLE QDC SYSTEM, 3"x3" DISCHARGE ELBOW, AND UPPER GUIDE BRACKETS
- 48" DIAMETER, 13.25' DEPTH, TO INCLUDE 3" DISCHARGE PIPING, 3" CHECK VALVES, 3" SHUTOFF VALVES, ALUMINUM COVER, GUIDE RAILS, FLOAT SWITCHES, ETC. (AS REQUIRED FOR APPLICATION) AND OTHER COMPONENTS REQUIRED TO PROVIDE WASTE CONVEYANCE FROM PUMP INLET TO DISCHARGE PIPE CONNECTION. (ENGINEER MAY CONSIDER DIFFERENT WET WELL DIAMETER AND DEPTH COMBINATIONS PROVIDED REQUIRED STORAGE CAPACITY IS PROVIDED FOR IN WET WELL. SUPPLIER SHOULD CONTACT ENGINEER DIRECTLY TO DISCUSS PRIOR TO PROVIDING PRICING TO CONTRACTOR TO ENSURE ACCEPTANCE OF ANY PROPOSED DIAMETER/DEPTH COMBINATIONS THAT ARE DIFFERENT FROM THAT SPECIFIED HEREIN).
- CONTRACTOR SHALL FIELD VERIFY SITE VOLTAGE AND PHASE THEN CONFIRM WITH ENGINEER PRIOR TO ORDER OF LIFT STATION EQUIPMENT
- PUMP CONTROL PANEL - TO BE HOUSED IN NEMA 4X STAINLESS STEEL ENCLOSURE AND TO BE FED 208V, 3 PH, 60 HZ ELECTRICAL SERVICE. TO INCLUDE EBARA PMRS, PLC, ETC. WITH PUMP ON, PUMP OFF, HIGH LEVEL ALARM AND LOW LEVEL ALARM CONTROLS AND ALL ASSOCIATED CONDUITS, WIRING, RELAYS, CIRCUITS, FUSES AND OTHER ELECTRICAL COMPONENTS FOR A FULLY FUNCTIONAL CONTROL PANEL.
- AND ALL OTHER APPURTENANCES REQUIRED FOR A FINAL AND FULLY FUNCTIONAL INSTALLATION

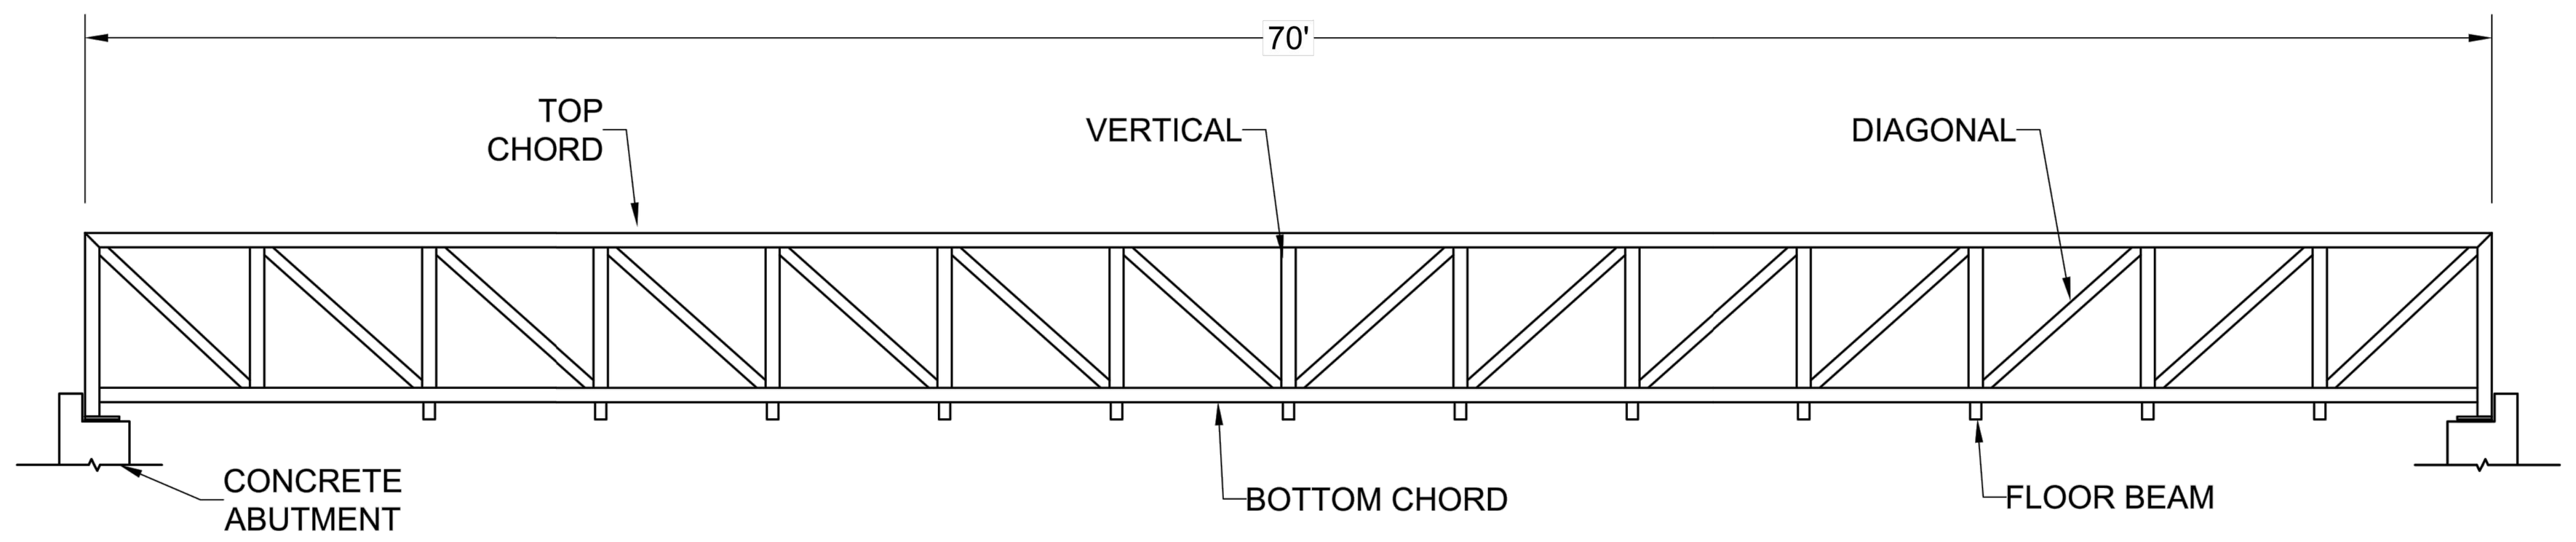
BRIDGE SUMMARY
Connector Pedestrian Bridge 70' Span x 6' Width
Deck Type: Concrete
Bridge Finish: Painted Black



BRIDGE ELEVATION

The graphic information and details contained in these plans is schematic in nature. The plans, elevations and sections have been developed automatically in a way that demonstrates your current input in a relative and proportional manner. The details included in these plans have been selected to represent commonly built construction assemblies. These are not Engineering drawings, and as such, the details may vary in the final design for your project depending on many variables that are selected in your final scope of work and specifications.

PRELIMINARY NOT FOR CONSTRUCTION

DIAGRAM NOTES

1. REFER TO SWITCHBOARD, PANELBOARD, AND TRANSFORMER SCHEDULES FOR ALL APPLICABLE FEEDER SIZES, BREAKER RATINGS, BUS RATINGS, TRANSFORMER RATINGS, ETC. NOT SHOWN ON THIS DIAGRAM.
2. NEUTRAL-GROUND BONDS SHALL ONLY BE MADE AT THE FOLLOWING LOCATIONS:
   A. MAIN BREAKER AT MSB-1B.
   B. MAIN BREAKER AT MP-W.
   C. SECONDARY SIDE OF ALL TRANSFORMERS.
3. REFER TO GROUNDING PLANS & TRANSFORMER SCHEDULES FOR MINIMUM GROUNDING ELECTRODE SIZES FOR DISTRIBUTION EQUIPMENT.
4. PROVIDE SERVICE ENTRANCE EQUIPMENT WITH ENGRAVED NAMEPLATE TO INDICATE THE SERVICE NUMBER (I.E. SERVICE 1 OF 2), THE LOCATION OF ALL OF OTHER SERVICE DISCONNECTS (I.E. MAIN ELECTRICAL ROOM), AND THE AREA SERVED BY THE SERVICE.
5. THE ELECTRICAL CONTRACTOR SHALL INSTALL CT'S ON SERVICE ENTRANCE CONDUCTORS FOR MONITORING BY THE BUILDING AUTOMATION SYSTEM. CT'S SHALL BE FURNISHED BY CONTROLS CONTRACTOR AND INSTALLED BY THE ELECTRICAL CONTRACTOR. COORDINATE ALL WORK WITH CONTROLS CONTRACTOR PRIOR TO ROUGH-IN.

LIGHTING FIXTURE SCHEDULE GENERAL NOTES:

1. ALL INTERIOR LIGHTING FIXTURES SHALL BE 3500K WITH A MINIMUM CRI OF 80 UNLESS NOTED OTHERWISE, AND ALL EXTERIOR LIGHTING FIXTURES SHALL BE 4000K UNLESS NOTED OTHERWISE.
2. CONTRACTOR SHALL COORDINATE ALL FIXTURE MOUNTING PROVISIONS WITH THE ASSOCIATED CEILING TYPE(S) PRIOR TO ORDERING FIXTURES.
3. ALL FIXTURES AND BALLASTS/DRIVERS SHALL BE RATED FOR OPERATION IN AMBIENT TEMPERATURES UP TO 55 DEGREES CELSIUS.
4. TO ENSURE PROPER COORDINATION AND LONG TERM SUPPORT FOR THE OWNER, ALL LIGHTING FIXTURES SHALL BE PURCHASED THROUGH MANUFACTURER'S REPRESENTATIVES AND DISTRIBUTORS LOCATED WITHIN SIXTY (60) MILES OF THE PROJECT SITE. SUBMITTALS RECEIVED THAT DO NOT COMPLY WITH THIS REQUIREMENT WILL BE REJECTED WITHOUT REVIEW. THE CONTRACTOR SHALL BE RESPONSIBLE FOR ANY DELAYS CAUSED BY NON-COMPLIANCE WITH THIS REQUIREMENT.

LIGHTING FIXTURE SCHEDULE KEYED NOTES:

BLD PROVIDE DIMMING DRIVER AS REQUIRED FOR 30% BI-LEVEL DIMMING.
DIM010 PROVIDE INTEGRAL 0-10V DIMMING DRIVER AS REQUIRED FOR 1% TO 100% FLICKER-FREE DIMMING CAPABILITY FOR THE DESIGNATED FIXTURE(S). VERIFY THAT THE PROPOSED DIMMING DRIVER IS COMPATIBLE WITH THE ASSOCIATED DIMMER PRIOR TO ORDERING FIXTURE. INSTALL ALL LOW VOLTAGE WIRING AS REQUIRED FROM DIMMER TO FIXTURE(S)
EM14 EMERGENCY FIXTURE. PROVIDE EMERGENCY BATTERY PACK RATED FOR AT LEAST 1400 LUMENS.
EMX EMERGENCY FIXTURE. PROVIDE EMERGENCY BATTERY PACK RATED FOR AT LEAST 90 MINUTES OF OPERATION.
FSA PROVIDE FINISH AS SELECTED BY ARCHITECT.

LIGHTING CONTROL PANEL NOTES:
1. LIGHTING CONTROL PANELS SHALL UTILIZE 30A RELAYS/CONTACTORS.
2. ALL PRESET TIMES FOR LIGHTING CONTROLS SHALL BE SET INTO THE LIGHTING CONTROL SYSTEM AS DIRECTED BY THE FACILITY MANAGER.
3. ALL INTERIOR FLOURESCENT/LED CIRCUITS SHALL BE PROGRAMMED TO BLINK OFF TO PROVIDE WARNING TO THE OCCUPANTS 5 MINUTES PRIOR TO AUTO OFF.
4. PROVIDE A BARRIER TO ISOLATE ALL EMERGENCY CIRCUITS.
